## **RAYLASE has optimised the Price / Performance ratio in its newest Product Line**

Or: Why invest in a Racehorse when a Workhorse really what you need?

**Wessling, near Munich Germany: With the introduction of the Laser-Heads RLA1004 und RLA1504 this summer, RAYLASE AG brings an exciting new Product Line to the market. These two extensions to the product range place RAYLASE in the enviable position of being able to further address the area of the market place where price is of special importance yet without having to compromise the Quality.**

Nobody can ignore the price pressure of the market. For those applications where the costs must be optimised, then this new series will of great interest. The exceptionally attractive price begins already at low quantities. Furthermore, the strongest argument for putting these newcomers to work is the outstanding performance and reliability. Deflection speeds in excess of 7m/sec and a Drift of less than 0,60 mrad over 8 hours at the operating temperature is achievable. The writing speed is in excess of 300 cps. Such performance at a fair Price makes the RLAs the preferred choice in the areas of Marking and Engraving. For YAG applications, RAYLASE typically recommends the 10 mm aperture whilst the 15 mm version is perhaps more suitable for the CO<sub>2</sub> wavelength. Customers will find themselves in a strengthened position obtained by combining low cost with excellent performance giving their products a terrific competitive advantage. Invest now in your future. **rsw/abg**
